Phone: 916-760-4554

MetalCloak's JK Skid Plate

Don't want to cut off the stock bracket under your JK Bumper, then reinforce it! The MetalCloak JK Skid Plate is provides additional strength with a plate of 10 gauge, laser cut steel that ties into the bumper and stock bracket; this provides a skid surface to help protect the factory bracket when the obstacles are a little bigger than anticipated. The JK Stock Bracket Skid Plate is finished in MetalCloak's signature texture powdercoat and is just one of the options you can choose when building your JK Combo Bumper. Create your own unique look for your individual Jeeping needs. MetalCloak, it's Your Jeep, Only Better.
