Phone: 916-760-4554

MetalCloak's JK Wrangler Vacuum Pump Relocation Kit

MetalCloak now has a retro fit system for the factory '12 and up JK Wrangler vacuum pump. The CNC machined gold zinc plated steel relocation bracket allows the vacuum pump to be moved to a protected area inside of the engine compartment. Keep the venerable component out of harm's way and gain the needed room for the fitment of most aftermarket bumpers, like the Frame-built MetalCloak bumper! If you can't armor it relocate it to a protected location. MetalCloak, it's Your Jeep, Only Better.
