MetalCloak's Hardline Front & Rear Tube Fenders.

MetalCloak, the originator of the bolt-on production tube fender, is once again expanding its offering to Jeep enthusiasts with the new Hardline Tube Fenders for the JK Wrangler. Featuring the signature MetalCloak lines and award-winning quality, but now with a sleek new look. Designed to replace the weak factory plastic fenders, the Hardlines come in steel, are easy to install and fit seamlessly to provide tire coverage, strength and clearance with the same industry-leading fit that compliments any Jeep build. Hardline Tube Fenders are part of a growing line of Hardline Body Armor products. Available in Raw Metal or their signature Black Texture Powder Coat. MetalCloak, It's Your Jeep, Only Better.
