Metalcloak's Overland Edition Flip-Step™ Low-Step or High Step Rub Rail for JK Wrangler... Now You Have a Choice

Metalcloak has updated an old favorite originally seen on the TJ & LJ Models, and brings the introduction of the Flip-Step™ for the Jeep Wrangler JK, 2 door and 4 door. The Flip Step can only be used with the Overland Edition Rocker Base. The Flip-Step, manufactured of 1 ½" .120 wall steel tube can be mounted in multiple configurations and offer a 3in lower Step/Rub-Rail or a high clearance Rub-Rail Step combination. An easy bolt on application to the Overland Edition Rocker Base™, the Flip Step installs in minutes and can be flipped up, flipped down, or completely taken off depending on your needs. The Overland Edition Flip-Step™ is the perfect addition to the Metalcloak Overland Rocker Base™ and looks great with Overland Tube Fenders™ on your Jeep Wrangler JK. Metalcloak, It's Your Jeep, Only Better. Information: MetalCloak, 916-631-8071, www.MetalCloak.com
