Phone: 916-631-8071

### MetalCloak's Stock Brake Line Relocation Bracket

Metalcloak offers an alternative to replacing the rear brake line on your lifted JK for moderately lifted Jeep Wrangler JK 2 doors and 4 doors. The Stock Brake Line Relocation Bracket moves the factory attachment for the rear brake hard lines down closer to the rear axle providing the additional reach needed for lifted JK Wranglers. Manufactured from laser cut steel and powder coated for an OE factory finish. The Brake line relocation kit comes with all needed hardware and is an easy install modification that provides just what your JK needs.

Metalcloak, It's Your Jeep, Only Better. Information: MetalCloak, 916-631-8071, [www.MetalCloak.com](http://www.MetalCloak.com)
