Phone: 916-631-8071

JK Wrangler Hi-Steer Kit

The MetalCloak JK Wrangler Hi-Steer kit corrects steering geometry when adding lifts over 3.5 inches. The system provides a HD Tubular Alloy Steel 1.375 OD X.375 DOM Drag Link that is mounted via a 1 ton anti flop rod end that is placed on top of the steering knuckle while the 7GA Laser Cut CAD formed steel relocation bracket finished in Gold Zinc Chromate raises the track bar to match the angle of the raised Drag Link and relocates the steering stabilizer up and out of harms way. Get your lifted JK performing its' best with the MetalCloak Hi-Steer Kit; It's Your Jeep, Only Better.
