Location: 3290 Monier Circle, Suite 100, Rancho Cordova, CA 95742
Phone: 916-631-8071

MetalCloak's Overland Sport 2.5"-3.5" Suspension

Travel with confidence using MetalCloak's Overland Sport Series suspension system. MetalCloak's True Dual-rate coils provide 2.5 or 3.5 inches of lift and assure a fantastic ride on and off the road. Adjustable bump-stops for the front and rear allow fine tuning of wheel travel for different tire sizes. Adjustable high clearance solid chromoly front track bar adds the needed durability and keep the axle on track. Add-on Shock extensions are included to keep upgrade costs at a minimum by reusing factory shocks. MetalCloak's Control Arm Relocation Drop Bracket Kit adds value by reusing the factory control arms and correcting the front axle caster; drop brackets are made of 7 gauge steel then welded into one piece making them the most durable drop brackets available. The MetalCloak Overland Preferred suspension comes with extended braided stainless steel brake lines, brake extension brackets and all hardware needed for installation. The MetalCloak Overland Sport suspension comes with extended braided stainless steel brake lines, brake extension brackets and all hardware needed for installation.
