Phone: 916-631-8071

MetalCloak's Overland Elite 2.5"-3.5" Suspension System

Adventure awaits with MetalCloak's Overland Elite Series Suspension System. MetalCloak's True Dual-rate coils provide 2.5 or 3.5 inches of lift and assure a fantastic ride on and off the road. Adjustable bump-stops for the front and rear allow fine tuning of wheel travel for different tire sizes. Adjustable high clearance solid chromoly front and rear track bars add the needed durability and assure the axles stay on track. MetalCloak's Control Arm Relocation Drop Bracket Kit adds value by reusing the factory control arms and correcting the front axle caster; drop brackets are made of 7 gauge steel then welded into one piece making them the most durable drop brackets available. The MetalCloak Overland Elite Suspension comes with extended braided stainless steel brake lines, brake extension brackets and all hardware needed for installation. The MetalCloak Overland Elite suspension comes with extended braided stainless steel brake lines, brake extension brackets and all hardware needed for installation.
