MetalCloak’s Overland Elite 2.5-3.5” Suspension System with RockSport Shocks for JK Wranglers

Adventure awaits with MetalCloak’s Overland Elite Series RockSport Edition lift system. A complete suspension package including True Dual-rate coils that provide 2.5 or 3.5 inches of lift and assure a fantastic ride on and off the road. RockSport Nitrogen Charged Long travel shocks are included and have been tuned specifically to work in unison with MetalCloak True Dual Rate Coils. Adjustable bump-stops for the front and rear allow fine tuning of wheel travel for different tire sizes. Adjustable high clearance solid chromoly track bars add the needed durability and assure the axles stay on track. MetalCloak’s Control Arm Relocation Drop Bracket Kit adds value by reusing the factory control arms and correcting the caster; brackets are made of 7gauge steel then welded into one piece are the most durable drop brackets available. Extended stainless steel brake lines and brake extension brackets and all hardware needed for installation included. This is a system to take your Jeep from stock height to lifted, getting the most performance out of your factory suspension parts. MetalCloak, it’s your Jeep Only Better.
